A Personal Message to Garden Lovers

HERE is a distinct tie that binds together those who have a common interest. This is especially true among those who gain pleasure from their gardens. It is in this spirit of friendship that we are sending you this catalog. We've tried to make it easy for you to choose just the varieties you want. Just consider the catalog as our salesman—when your orders come to us they have personal attention from capable executives. We are proud of our stock we send out—proud of the reputation we have gained. Write us for any help we can give you to make your garden more beautiful.

What "Kentucky Bred" Means to You

Kentucky has long been famous for its beautiful women and its wonderful horses. It is fast becoming famous for its flowers as well. Exceptionally rich soil and a moderate climate make for luxuriant growth and exceptional beauty. Added to that, we at Schulz Dahlia Farm give the best in scientific care and cultivation. The words "Kentucky Bred" have come to mean the best of quality to be found in Dahlias—also Peonies, Irises, Glads, plants, trees and shrubs. You'll realize best what "Kentucky Bred" means to you after you have enjoyed any one of them in your garden. Try and see.

A Complete Service

Our Florist Shop at 550 South Fourth Avenue in Louisville has served people of this vicinity for many years. We handle orders from all over the country for many of our friends and customers, either by mail or by use of the Florists Telegraph Association. If you want something—just a little better—in a bouquet or floral piece, let us serve you.

A Hearty Invitation

When in Louisville come and see us. Take advantage of the opportunity of seeing one of the finest nurseries in the south. You'll find a hearty welcome awaiting you. Stop at our downtown office, 550 South Fourth Avenue. We'll direct you to the farm. You'll miss a real treat if you fail to visit us in Dahlia time.
Our Specialty Is Dahlias

We specialize in Dahlias because to us they are the most beautiful of all flowers. While others may not entirely agree with this opinion, it must be admitted that they are without doubt the most beautiful of late season flowers. No matter how small or how large, is complete without a fair representation of these most gorgeous blooms.

History of the Dahlia

From the years 1571 to 1577 a Spanish physician, one Hernandez, resided in Old Mexico. Like other professional men of his time, his interests were broad. No doubt his practice was limited, for he found time to write an extensive work on the animal and plant life of the country.

Some years afterwards, one Reecio brought Dr. Hernandez's work back to Europe with him and published it in Rome. The book contained among other interesting and unusual descriptions of plant and animal life, a brief mention, description and illustration of the plant “Acocitl.” His comments lead us to believe that the plant described was the Dahlia. It grew wild in the sandy soil of that country and in single form. This is the first known reference to the flower.

In 1791, Cavanilles, another Spanish botanist and botanist of note, published a technical botanical description of a flower he had grown from seed brought from Mexico. He called it “Dahlia Pinnata;” Dahlia, after a young Swedish botanist, Andreas Dahl, who had been Cavanilles' student and who had died just two years earlier.

Such was the start of the Dahlia in Europe. In the early part of the 19th Century the Dahlia was introduced into England and France and began to be extensively grown. From this single blossom of “Acocitl” with its yellow disk center and scarlet rays, the various forms of the Dahlia have developed until now we have not only single blossoms in a profusion of colors but a large variety of shapes and forms, each one in as many different colors. Each year brings added varieties from growers, each a new prize to treasure. The Dahlia has become the most loved of all late summer flowers. There is a shape and form for each taste and a color for every mood.

The Culture of the Dahlia

The Dahlia thrives in an open, sunny location, though they will succeed in partial shade in most instances. They will grow in any kind of soil, but a rich, sandy loam is the best soil to enrich poor ground in the fall spade in well-rotted manure or decayed vegetable. Use bone meal at planting time, white or chicken manure well into the soil. Spade the soil thoroughly as deep as possible before the tuber is planted.

Planting - Dahlias are planted in the spring. It is safe to plant them any time after the danger of frost is over. They usually blossom in from six to eight weeks after planting time. It is a good plan to start planting early and plant tubers about one to two weeks apart up until the middle or late part of May. When ready to plant, place stout stakes at least three feet apart, four feet is better; then dig the holes about six inches deep and place the bulb in a horizontal position with the sprout end two inches from the stake. Never stand the bulb on end. This method of planting is known as the “stake” method and is the most successful for general results.

Cultivation - For the most beautiful flowers, cultivate often. Keep the soil loose around young plants. Do not permit it to bake or harden. After each rain cultivate them to keep the ground in good condition and prevent weed growth. Later in the season when the fine, silky roots come to the surface stop cultivation and put a mulch of some kind around the plant to retain moisture and protect the small roots.

Training the Plant - After several sprouts appear remove one but one or two from each plant. When they are sufficiently above the ground to show three or four leaves, pinch out the center stem. This will cause branches to grow from the laterals and produce a strong, bushy plant. At this time they should be securely tied to the stake with twine or some soft material. Continue the tying as the plant grows so that it will not be broken down by wind or other causes.

For Large Blossoms - For extra large blooms remove the first set of side shoots from the first bud with a sharp knife. This forces the plant life that would have gone into the two side shoots into the first bud, making an extra large flower, much larger and giving a good stem. For exhibition purposes disbuds every side shoot down the entire length of the stalk. The one flower that you will get from the plant will be of gigantic size.

Forcing for Exhibition - To produce the finest flowers for exhibition purposes, plant three to five feet apart, using a liberal amount of manure or fertilizers: cultivate frequently; apply fertilizer or manure, broadcast or liquid form, at each or every other hoeing, and disbud. Nitrate of Soda proves very effective for forcing. Apply when plants are in bud, making applications often, but do not use too much at a time. Apply Nitrate of Soda in crystal form on top of the ground, or in liquid form, using one tablespoon of nitrate of soda crystals to a gallon of water, using sprayer or watering can.

When the flower-buds appear, only one bud should be allowed to come to maturity, enabling each branch to produce one exceptionally fine, perfect flower. The flowers, for quality, must not be allowed to receive the drenching rains or scalding sun when nearing full bloom and should be protected from such.

It is always advisable to cut flowers that are to be exhibited as late as possible at night, as the dew is on them, placing them in water and keeping them as cool as possible over night, thereby enabling them to withstand handling, packing and transportation.

Watering. Use very little water until flowering buds appear, after which plants can be thoroughly watered about once a week. Soak the ground until moist at least six inches deep. Rake over the surface the following day. This conserves moisture and lets in air and sunshine.

Harvesting. As soon as the frost kills the foliage and the strength of the stalk recedes into the tubers, harvest your Dahlias. Dig them up carefully, do not pull them up. After removing the clumps of the ground, gently remove the soil that will naturally fall off. Cut off at tops two or three inches from the clumps. Lay them in the sun and air for about an hour or two. Pack in a cool, frost-proof place having an average temperature of about 45 to 55 degrees. The cellar provides the best place for their storage. It is a good plan to insulate them from furnace and frost with burlap, paper or canvas. This excludes the air and preserves an even temperature. This is very important, as bulbs will shrivel and dry up if not properly taken care of.

Dividing the Clumps. Divide the clumps in the spring. The dividing should be done carefully with a sharp knife or coping saw and particular care should be taken to avoid the necks of the tubers. The eyes of the tubers are easily recognized. Cut the tubers so that there is at least one eye on each division of the clump.

To Preserve Cut Flowers. Flowers should be cut late in the day, early in the morning. Place tips of the stems in water for about twenty seconds while boiling on the stove and immediately plunge the tips deep into cold water. If blooms droop prematurely place stems deep in hot water and allow them to remain until the water cools. This will usually revive them. A pinch of salt in the water helps.

Classification of Dahlias

We follow the classification of Dahlias as adopted by the American Dahlia Society. Under the different headings, classifications follow the names and their application as recently defined by the American Dahlia Society follow:

Single. Open-centered flowers, small to very large, with 8 to 12 floral rays (petals) more or less in one circle, margins often decurved or revolute, (turned downward or backward).

Collarette. Of single type, with not more than nine large floral rays, but with a circle of smaller, narrower, usually different colored, rays standing at base or in front of larger rays and forming a collar between them and open center.

Duplex. Semi-double flowers; center almost expelled on opening of bud, rays more than twelve, in many more than one circle, long and flat, or broad and rounded, not noticeably twisted or curled. Many Dahlias previously classed as Peony-flowered belong here.

Peony-flowered. Flowers are semi-double, having two, three or more rows of broad, flat, loosely arranged rays or petals, surrounding an open center which is usually a conspicuous golden-yellow, the inner floral rays being usually curred or twisted, the outer rays either flat, or more or less irregular. Sometimes the rays are pointed, occasionally they curl and twist over the center.

Decorative. Double flowers, full to the center, early in the season at least, flat rather than ball-shaped, with broad, flat, somewhat loosely arranged floral rays with broad points or rounded tips which are straight or decurved (turn down or back), not incurved, and with margins revolute, if rolled at all.

Ball Shaped, Double. Full to the center.

Decorative Dahlia, Mina Burgle

(A) Show Type. Flowers globular or ball shaped, rather than broad or flat, full to the center, showing regular spiral arrangement of florets, with floral rays or petals more or less quilled or with their margins involute (rolled forward or inward) and rounded tip. (Dahlias of this type with flowers spotted, variegated or partii-colored, were formerly classed as Fancy, a group no longer recognized).

(B) Hybrid Show, Giant Show or Colossal Type. Flowers fully double, broadly hemispherical to flatly globular in form, loosely built so spiral arrangement of florets is not immediately evident; floral rays broad, heavy, cupped or quilled, with rounded tips and more or less involute margins. Verging toward the Decorative Class and sometimes found classed with the Decoratives.

(C) Pompon Type. Same shape and form as A and B, but flowers must be under 2 inches in diameter.

Cactus. Double flowers.

(A) True Fluted Type. Flowers fully double, floral rays or petals long, narrow, incurved or twisted, with sharp, divided or fluted points and with margins revolute (rolled backward or outward), forming in the outer florets a more or less perfect tube for more than half the length of the ray or petal.

(B) Hybrid Cactus. Flowers fully double, floral rays (petals) short as compared with previous type; broad, flat, recurved or twisted, not sharply pointed except when tips are divided (staghorn), margins only slightly revolute, and tubes of outer florets less than half the length of the ray or petal. This type intergrades with the Decorative and Peony-flowered classes.

A FIRST PRIZE DAHLIA DISPLAY

October 4, 1926.

Gentlemen:

Referring to the three dahlias I received from you during May this year.

The Mrs. I. De Vere Warner and William Stark Smith came thru in fine shape and bloomed in fine condition. They took at the point. They helped fill out my entries so that I received first prize for best display of dahlias, first prize for display of six or more varieties and the Mrs. I. De Vere Warner took first prize for best single specimen.

I have had quite a number of compliments on the exhibition, and naturally they wish to know where I secured same.

Yours truly,

P. H. STARKE,
1627 Cass Street, Fort Wayne, Ind.
Jersey's Beauty

The Only True Pink Dahlia

That is what the connoisseurs say about Jersey's Beauty. Most pink Dahlias have a slight tint of lavender in the petals. Jersey's Beauty is a true pink, almost entirely free from the lavender tinge. Because of its exceptionally true color it is considered the finest pink Dahlia ever introduced. The color is a lovely rose pink. The blooms are large and of a true decorative type—well rounded and artistically proportioned. Extra fine stems. Truly a Dahlia treasure, a flower that the connoisseurs and amateur growers will be equally enthusiastic about. Our extensive growing facilities and exceptionally large stock make it possible to offer you this Dahlia for the price of

$2.00 each

305. **THE WIZARD OF OZ.** This is a Dahlia of immense size. Color is a rare shade of glowing amber pink with soft salmon shades. It has a good, straight stem. $3.00 each

306. **ILLAMOOK.** Color delicate blush, deepening at the tips to rose-pink. Its pleasing color, combined with its large size and free blooming habit, make this a prize-winner. 35c each

307. **TOMMY ATKINS (Decorative).** This is a most unusual red, the color being entirely different from the general run. Large, deep blossoms, attractively formed on good stems. A splendid bloomer. $2.50 each

308. **TRYPHINNIE (Decorative).** Color bright shell pink, shading lighter at the tips of the petals. At the base and throughout the petals is seen a bright golden yellow, reverse of petals is rich pink, giving the flower a decidedly new color. This is another splendid exhibition and cut flower variety. $1.50 each

309. **VANITY.** Flowers bounteously on cane-like stems. Color a glowing coral-pink. Cuts and keeps well. Something truly stylish. $1.00 each
Show Dahlias

WONDERFUL DAHLIAS

Dear Sir:

Sept. 12, 1926.

Thought I would write you a few lines in regard to my dahlias. My dahlias are wonderful; they have been loaded with immense flowers for about two months, and are sure a beautiful sight. My neighbors tell me theirs are not blooming, and cannot understand why mine are loaded with flowers all the time. I told them to get their bulbs of you, and then they would have lots of flowers, too.

Yours truly,

MRS. F. R. BURGER,
Gallon, Ohio.

VERY NICE BULBS
Jacob Schulz Co., October 18, 1926.

Dear Sirs:
I wish to thank you for the very nice bulbs I received from you this year. Every one was true to name and color. I have had a very successful season. I want to place my order for the same amount this year.

Very truly yours,
MRS. W. E. NORRIS, Atlanta, Ga.
Single Dahlias

97. FRINGED TWENTIETH CENTURY. A great improvement over Twentieth Century; much larger, brighter color, while the stems are long, slender and stiff. Color bright rosy crimson, with lighter streakings. Height 4 feet. 15¢ each

150. JOSEPHINE. Flowers very large, of splendid regular form, but, unlike so many white single Dahlias, the long, wavy stems hold the flowers erect. Strong grower. 15¢ each

192. MARGARET PERKINS. One of the most beautiful varieties. The flowers are very large, have rather pointed petals, are white, but not overlaid, and are borne on long, stiff stems. The color is pure white, with about half of each petal tipped light pink, first flower being tipped cerise pink, and like Twentieth Century, of which it is a seedling, growing steadily lighter as the season advances, becoming a clear, soft pink late. 15¢ each

299. SENSATION. Vivid vermilion, heavily tipped white. An early and profuse bloomer. 15¢ each

Decorative Dahlia, Wizard of Oz

234. MRS. JOSEPH LUCAS. Rich yellow, overlaid bronzy scarlet, lightened, suffused and edged salmon rose. The flowers are immense in size, of splendid substance, lasting a week after cutting. Medium height (4 feet) and blooms extremely as to resemble a huge bouquet. 15¢ each

LARGE SIZE

Sirs:

Today I cut a blossom from D. M. Moore which measured 16 inches around and 3½ inches across. I thought maybe you would be glad to hear of my good luck, as I am a very proud lady, and I thank you very much for such wonderful flowers. I would like to try some of your rose plants, as I am sure they would be as wonderful as the dahlias are, and I hope that the rest I received from you will turn out as good.

Thanking you again,

MARY HURLETT

Kenmore, Ohio.

Gentlemen:

Sept. 10, 1926.

I have received the Iris and am pleased. You certainly send out fine Iris roots.

Thank you for the extra root.

Sincerely,

MRS. JOHN Sobotka

Little Rock, Ark.

Roses

The chief requirements of Roses are fairly heavy soil and ample fertilizing. Under ordinary conditions the plants succeed best in loam or clay which has been deeply spaded and well fertilized several weeks before the planting. It is always advisable to use a well-composted manure, though compost should be thoroughly mature before applying. Pruning is usually done in April, when the weak shoots should be cut out and the growth of the more vigorous kinds cut back quite severely; always cut to an outside eye. Tea Roses should not be pruned until the latter part of April or until the first of May.

Hybrid Perpetual Roses

AMERICAN BEAUTY. Deep pink and crimson; flowers intensely fragrant. Most desirable for cutting.

ANNA DE DIESBACH (Laeherne 1859). Bright carmine red, producing large, full fragrant flowers which are very attractive. Free bloomer and vigorous grower.

FRAU KARL DRUSCHKI. Because of the immense size of the blooms this is frequently called the "White American Beauty"; probably the best white garden Rose.

GEN. JACQUEMINOT. Crimson scarlet, large, full, very fragrant.

J. B. CLARK (H. Dickson 1865). Deep scarlet shaded blackish maroon; large full bloom.

MAGNA CHARITA. Bright rose, very large and double; good form and fragrant.

MRS. JOHN LAING (Bennet 1887). Soft, clear pink; long buds which open into cup-shape flowers. This is a strong grower and free bloomer.

PAUL NEYRON. Deep rose, flowers of immense size. Many claim this to be the largest Rose grown.

Hybrid Tea Roses

AMELIA GUDE. Color very similar to Mrs. Aaron Ward, the opening flowers resembling Sunburst. By many these are considerably superior to either of these roses.

AMERICA (Hill 1921). Color beautiful large rose pink; fine shaped flower; foliage is a deep, glossy green; very free bloomer.

AMERICAN LEGION. Beautiful crimson. An unusually strong grower.

ANGELUS. This is a very pretty creamy white Rose; fine form, fragrant and a good grower.

COLUMBIA (E. G. Hill Co. 1917). One of the most popular Winter cut flowers and also one of the best bedding roses. A bright red, large, full globular flower, with an immense, vigorous habit and exceptionally free blooming. The flowers are of good size, and in perfect form, both in bud as well as when fully expanded. In color it is a pleasing shade of rose pink; fragrant.

COVENT GARDEN. This is a rich, deep crimson of splendid form, producing very full blooms.

CRUSAIDER. A rich, velvety crimson, fine strongly growing variety, excellent flower stems and produces very little mildew. For its size a prolific producer.

DOUBLE PINK KILLARNEY (Scott 1910). This variety can be highly recommended. Beautiful shade of satiny pink; wonderful color.

FRANCIS SCOTT KEY. Color rich crimson red; of immense size. This is a sturdy grower and a good bloomer.

FRANK W. DUNLAP (Dunlap 1920). At the International Flower Show, New York, this Rose won silver medal, also gold medal sweepstakes for the best new pink Rose. Claimed to be better than Mrs. Chas. Russell.

GUN. McARTHUR. The shape is fine; color brilliant scarlet.

GOLDEN OPHelia. Not a sport, but a seedling from the universal favorite Ophelia. A sturdy, stiff-stemmed grower with wonderful foliage; closely set and glossy. Flower is of medium size, from a beautifully formed bud of bright golden yellow.

HADLEY (Waban 1915). A splendid garden variety; color rich crimson, carrying to deep, velvety crimson. Very fragrant; good grower.

HELEN GOULD (Lannert 1898). Color light watermelon red; flowers of excellent form.

HOOSIER BEAUTY (Dorner & Sons 1915). Well shaped, long buds; perfect flower, of an intense, rich, dazzling crimson scarlet. Very fragrant.

JONKHEER J. L. MOCK (Leenders 1910). One of the best bedding varieties. All flowers are produced on long, stiff stems, are of large size and of perfect form. Deep imperial pink; outside of petals silver rose.

KAISERIN AUGUSTA VICTORIA (Peter Lambert 1890). Soft, white, lightly tinged with pink; very fragrant.

KILLARNEY. Color pale flesh pink, flushed deeper pink. A fine bloomer.
PREMIER. This is very similar to the well-known Killarney in size, shape, etc., the only difference being that it is absolutely snow white. $1.00 each; $9.00 per doz.

LADY ASHTOWN (Dickson & Sons 1901). One of the finest flowering varieties in the collection, and produces perfect blossoms under all weather conditions: splendidly profuse; color soft tints shading to yellow at base of petals. $1.00 each; $9.00 per doz.

LA FRANCE (Guilhot 1867). Queen of all the Roses. Beautiful bright silvery pink, with pale lilac shading. 75c each; $9.00 per doz.

MME. BUTTERFLY (E. G. Hill & Co. 1918). More vigorous in growth than Ophelia. The individual bud is larger and the color tints of Ophelia are greatly intensified, making it a harmony of bright pink, apricot and gold... $1.00 each; $12.00 per doz.

MME. JULES GROLEZ (P. Guilhot 1907). Clear rose, shaded yellow at base; long, pointed buds. 75c each; $9.00 per doz.

MME. SEGOND WEBER (Soubert & Notting 1908). Color beautiful rosy salmon, suffused with golden sheen. This is a very free flowering variety. $1.00 each; $9.00 per doz.

MRS. A. R. WADDELL. Color delicate, soft rosy salmon, suffused with golden sheen. This is a very free flowering variety. $1.00 each; $9.00 per doz.

MRS. HENRY MORSE (S. McEarty & Son 1900). Color beautiful shade of pink, shaded salmon, deeper at base. $1.25 each; $15.00 per doz.

MRS. H. R. DARLINGTON. Color creamy yellow; almost perfect in form and a splendid grower. 75c each; $9.00 per doz.

OPHELIA (Wm. Paul & Son 1913). A Rose that is admired by everyone; its flowers are held erect on long, stiff stems, are of perfect form, good size, and of a most pleasing, delicate tint of salmon; flesh, shaded with rose; very floriferous... $1.00 each; $9.00 per doz.

POLYANTHA ROSES

BABY RAMBLER. This is the original Baby Ramble, in bloom all the time. Flowers in large clusters. Color bright crimson... 75c each; $9.00 per doz.

BABY DOROTHY. This is a glorious Rose. Flowers resemble the Dorothy Pinks, and close the plant with its bloom... 75c each; $9.00 per doz.

BABY TAUSENSCHOEN (Walter 1911). Flowers large and much like Tausendschoen. This is a bush form of climbing Tausendschoen or Thousands and Beauties, having all the charms in the variable coloring in its flowers that its parent has... 75c each; $9.00 per doz.

CHATILLON. Color silvery crimson which gradually passes to a white center. The flowers are semi-double and are produced in large sprays of from 15 flowers or more to the spray... $1.00 each; $12.00 per doz.

ERNA TESCHENDORFF (Teschendorff 1911). Color deep crimson... 75c each; $9.00 per doz.

IDEAL (J. Speck 1922). Color very beautiful, dark cerise; heavy foliage... $1.00 each; $12.00 per doz.

LAFAYETTE (Joseph Gui). Color bright scarlet red. This is a very free flowering variety, producing semi-double flowers... $1.50 each; $12.00 per doz.
Hardy Climbing and Rambler Roses

AVIATEUR BLEIROT (The New Yellow Rambler). A strong-growing plant with beautiful, glossy, insect and disease-proof foliage, and bearing large clusters of medium-sized full double flowers of a saffron yellow, deepening to an almost golden yellow at the center.

AMERICAN PILLAR. A single-flowering variety of great beauty. Flowers 3 to 4 inches across, of a lovely shade of pink, with clear white eye and cluster of yellow stamens.

BESS LOVETT (Van Fleet 1905). This resembles climbing American Beauty in shape of blooms and the large foliage is very attractive. Color clear, bright red; very fragrant and one of the hardest climbers.

CLIMBING AMERICAN BEAUTY. A strong, healthy, vigorous grower, frequently making shoots from 10 to 12 feet long, and good-sized flowers for a climbing Rose that blooms so freely; Color a pleasing rose pink; of splendid form, good substance.

CLIMBING KAISERIN AUGUSTA VICTORIA. Color waxy white, shading to soft primrose.

CRIMSON RAMBLER. Bright crimson flowers, produced in large clusters of pyramidal form. A grand variety for pillars and arches.

CHRISTINE WRIGHT (Hoopes Brother & Thomas Co. 1899). Color bright, clear wild rose pink, producing blooms 3 1/2 to 4 inches in diameter. This strong climbing rose has large, thick, leathery foliage and is of great beauty. Color to mildew.

DR. W. VAN FLEET. A Rose, which on account of its dainty color of exquisitely shaped buds and flowers, has become a great favorite. The long-pointed buds are a rich flesh pink, on stems 12 to 15 inches long; splendid for cutting.

DOROTHY PERKINS. A very fine deep pink. The flowers are borne in large clusters of small double blooms and are very sweetly scented.

EMILY GRAY (Williams 1918). Color clear golden yellow; flowers are double with large buds, dark green foliage. This is a very free flowering variety.

GARDENIA (Manda 1899). Color deep, rich golden yellow; passing to creamy white. It is a very profuse bloomer. Flowers are large and splendid for cutting.

HIWATHA. A brilliant, ruby carmine with a clear white eye and a mass of golden stamens—a glowing combination of colors, which can be seen at a great distance.

LADY GAY. Delicate cerise pink, passing to soft-tinted pink. The effect of a plant in full bloom and the deep green of the foliage is indeed charming.

MARY LOVETT (Van Fleet 1915). This is a pure, matchless, white climber, producing large flowers. By many it is considered the best of the white climbers.

Climbing American Beauty

PAUL’S SCARLET CLIMBER. Considered one of the greatest climbing Roses grown. This is one of the newer climbers and without doubt the most important addition to the list of climbing Roses. Color vivid scarlet. Does not burn or bleach until the petals fall.

ROSERIE (Witterstaetter 1917). This variety is of the same habit of growth as Tausendschoen, same is true of its blooming qualities. Color is a more even shade of cerise pink or carmine. This is a very free bloomer and of vigorous growth.

SHOWER OF GOLD (Paul & Son 1910). Color deep golden yellow with orange shadings in the center.

SILVER MOON. Different from all other Roses, with beautiful semi-double flowers 4 1/2 inches and over in diameter; pure white in color; petals of great substance.

TAUSENDSCHOEN. Not stiff or unnatural, but as beautiful as a semi-double azalea. The color is a delicate shade of soft pink when first opening, changing to carmine on the reverse of petals when fully expanded.

WHITE DOROTHY. Among Rambler Roses none has justly gained greater popularity than the beautiful pink Dorothy Perkins. The White Dorothy is a duplicate except in color.

Prices of Climbing Roses, $1.00 each.

Rosa Hugonis

This rose is a spectacular show in itself. Every branch of the previous year’s growth becomes lined on both sides to the very tip with closely set, wide open, single flowers, like dainty yellow hollyhocks and the branches bend over with the weight of the bloom. A symmetrical bush about six feet in height and the same in diameter when matured. Even when through blooming it is a beautiful shrub.

Price, each .......... $1.25
5 for $5.50, 20 for $20.00

DOING FINE

The shrubbery and plants I purchased from you last year are doing fine and are wonderful plants. Thanks again—MRS. JOS. DELELLO, Indianapolis, Ind.

LARGE AND HEALTHY

November 8, 1926.

Dear Sir:

Would like to advise you my order of tulips, crocus, etc., arrived O. K. and in good condition. I am very much pleased with the bulbs as they are large and healthy. Am looking forward to some pretty blooms in the spring. Many thanks.

Yours truly,

MRS. W. O. COLLINS,
123 Greenfield Ave., Nashville, Tenn.
Lilies

They are most graceful in line, brilliant in delicacy of color, and of delightful fragrance. Lilies do best in the hardy border or among shrubbery, as there they get the benefit of the shade of surrounding plants which is so necessary to their welfare.

AUGUST LILY. See Funkia.

AURATUM (Golden-banded Lily). This is one of the prettiest, if not the prettiest, of all Lilies. Flowers creamy white, spotted brown. ....... 50c each; $1.00 per doz.

CANDIDUM (Madonna Lily). This variety is of easy culture, with plenty of flowers in June; very fragrant .................. 40c each; $1.00 per doz.

ISMENE CALATHINA (Peruvian Daffodil). A fine Summer flowering bulb, producing large Amaryllis-like, pure white, fragrant flowers. Bulbs must be kept in a dry, warm place. Plant out middle of May. Bulbs must be taken up in the Fall. 35c each; $1.00 per doz.

LEMON LILY. See Hemerocallis.

REGALE (Lilium Myriophyllum). This is known as the Royal Lily of China, and is one of the finest Garden Lilies ever introduced in America. It is claimed that this is a rival to the Jassamine in fragrance. The blooms will last for days after being cut, having wonderful substance, perfectly hardy and will thrive and do well in any rich garden loam, either partly shady or all sun. Color a beautiful creamy white, with bright golden throat, outside of flowers white, tinted yellow at the base, with delicate purple mid-ribs having three wide and three narrow petals. ....... 75c each; $1.00 per doz.

SPECIOSUM ALBUM. Similar to the following, but pure white .......................... 40c each; $1.00 per doz.

SPECIOSUM RUBRUM. White and deep pink. One bulb produces from eight to twelve flowers. ....... 40c each; $1.00 per doz.

YELLOW DAY LILY. See Hemerocallis.

Phlox

One of the most attractive of our perennial plants. Its erect stems, topped by great clusters of small flowers, puts it in a class by itself.

For border planting, there is nothing to equal the Phlox. Their brilliant blossoms are borne in great profusion and retain their superb colorings for some time, giving color and finish to a mass planting of shrubs and brightening up the dullest places.

Prices, except where otherwise noted, 25c each; 85c per doz.

AURORA BOREALE. Salmon scarlet, deep crimson eye. BOUQUET FLEURI. White, cherry red eye.

ELIZABETH CAMPBELL. Large trusses of flowers of quite a new color—light salmon, changing to pink in center. Extra.

FRAU ANTOINE BUCHNER. Undoubtedly the finest white Phlox yet introduced. Strong habit; flowers of enormous size and perfect form.

HANS VOLMULLER. A very pretty mottled variety, ground color white, delicately suffused and mottled with soft violet mauve.

JEANNE D’ARC (syn. Pearl). White. Fine late variety.

JULES SANDEAU. Very large, flowering pure pink, Dwarf.

LA FRANCE. Light violet rose, light carmine eye; medium size.

LAMARTINE. Rich para violet, large white center; very fine.

MISS LINGARD. White, faint lilac eyes. A grand free-blooming variety.

MME. E. LOVE. Large pure white blooms; foliage light green, mottled yellow.

MRS. JENKINS. The best white Phlox on the market; splendid for massing. Comes into flower early in the season.

RHEINLANDER. Color beautiful salmon pink: flowers and trusses of extra large size.

R. P. STRUTHERS (Tall). Salmon pink with crimson center.

THOR. Color a lively shade of deep salmon pink, suffused and overlaid with a scarlet glow, aniline red eye. This is a very popular variety.

Mexican Everblooming Single Tuberoses

This is a single, pure white variety and begins to flower in July and continues throughout the season. Wonderfully fragrant. ....... 10c each; 75c per doz.; $2.00 per 100

A FINE COLLECTION

Gentlemen. August 7, 1926.

Enclosed please find $1.00 for one gallon Special garden. The dainty collection we purchased from you at the Fair in Atlanta were fine. Yours truly, M. B. MacGregor, Tampa, Fla.

Hardy Chrysanthemums

After the frost has taken all other flowers, the Hardy Chrysanthemum greets us with an abundance of blooms of various hues and colors. It is one of the most satisfactory and popular Fall Flowering Plants. Frost will not harm the blooms, and plants are easily grown, making a fine addition to any garden. The most satisfactory way to carry the plants through the winter is by placing them in a well drained position and covering with a good mulching of leaves or loose litter. The varieties listed below usually begin flowering about the last of August and continue during October and November. All of our plants are sent out of 2½-inch pots and we begin making delivery in April, continuing until July 1st. Price for good strong plants: 

A. BARHAM. Beautiful orange bronze. Early.

ADIRONDA. (Introduced by E. D. Smith & Co.). The best early golden bronze. True pompon type. 

ALICE HOWELL. A beautiful shade of orange yellow. Single. Early as well as free flowering.

ANGELO. (Introduced by E. D. Smith & Co.). A beautiful light pink. 

BOSTON. Strong, upright growth; clear bronze.

BRONZE QUEEN (Elmer Hill & Co. 1918). An even shade of golden bronze. 

CHALDREON. Reddish crimson with gold tips. Large flower.

CHAMPAIGN. Bright ruby red. Wonderfully colored.

CHAMP D’OR. Canary yellow. Very bushy habit.

CRANFORD. Exceptionally early. Deep bronze yellow.

CRANFORD PINK. Beautiful shade of light pink.

DOROTHY. An early snow white variety. 

EDEN. A bright rose. A beauty when disbudded.

HARVEST HOME. Deep bronze yellow. Excellent.

LA SOMME. Deep mauve pink.

LE PACTOLE. Produces large bronze yellow flowers. Strong grower.

MRS. HARRISON CRAIG. Yellow overlaid with orange crimson.

NORMANDIE. One of the earliest and best cream whites.

OURAY. (Introduced by E. D. Smith & Co. 1919). Dark mahogany brown flowers of medium size. 

PETITE LOUISE. A slivery pink.

WOLVERINE. A seedling from Normandie but has a much heavier and stronger stem. Produces large sprays and is also an excellent variety for pot plants. Color bright yellow. Very early flowering outdoors in this locality with Normandie and Carrie, about August 20th.

Lawn Grass

In making a lawn, if the soil is naturally rich, all that is necessary is that it be well spaded, making it as fine and mellow as possible. Otherwise, a good dressing of well-rotted manure should be spaded in and mixed with the soil. The next requisite is good seed of the right varieties, sown at the rate of 60 to 100 pounds per acre. The more freely the seed is used the quicker a thick, velvet-like turf may be secured.

There is no question about the quality of grass seed which is offered our customers—it is of the very best grade to be secured.

**Sweet Peas**

*Orchid Flowered*

The best of the old-fashioned or Grandiflora varieties are now quite overshadowed by this wonderful type, which is quite distinct, having large, round, open flowers of extraordinary size, usually measuring 2 inches across, with wavy standards and wavy spreading wings and a stem which is long and strong, making them of exceptional value for cutting. All the sorts offered below have been thoroughly tested and are just as easy to grow as the Grandiflora varieties.

Per packet .................. 10c; Oz. 40c; 1/2 lb. $1.25

**BARBARA.** Beautiful rich orange salmon. A most brilliant color and makes a most effective bunch.

**BLANCHE FERRY SPENCER.** Identical in color to the popular pink-and-white Blanche Ferry; immense wavy flowers.

**CONSTANCE HINTON.** The most important introduction in years; of strong, vigorous growth, with enormous wavy white flowers, frequently 2½ inches across, which are borne in sprays of fours, and often fives, on long, strong stems.

**DOBBIE'S CREAM.** An extra-selected strain and the finest primrose yellow yet introduced; splendid in every way, with very large, wavy flowers.

**ELFREDA PEARSON.** This is far the largest and finest light pink variety.

**FLORENCE NIGHTINGALE.** Nothing yet introduced in lavender Sweet Peas excels this beautiful sort. Very popular.

**HERCULES.** A lively rose pink.

**KING OF WHITE.** The largest, finest and purest white-seeded variety.

**MARGARET ATLEE.** Rich apricot pink on a cream ground color. Very rich.

**MARGARET MADISON.** Opens a delicate azure blue, developing to a clear, light lavender. Exquisite, soft lavender blue, slight suffusion of rose. Flowers large.

**ROBERT SYDENHAM.** This grand variety is a distinct, new color, being a glowing orange throughout; good strong grower; flowers of characteristic Spencer size and form.

**ROYAL PURPLE.** Rich royal purple. One of the finest and most distinct varieties.

**WEDGWOOD.** Bright silvery or wedgewood blue. A beautiful and popular color.

---

**Peonies**

Peonies are beautiful additions to any lawn or garden. They rival the rose in beauty and fragrance. Wide variety of color and type offers opportunity for many artistic effects. Peonies are unsurpassed for cut flowers as they last longer in water than any other flower. Plant them in September in loosened soil with leaf mould or cow manure mixed in. Fresh manure should never be used with the soil. In the spring it may be spread on the ground. Protect Peonies during the colder months with about 3 inches of leaves. Our variety is wide and as complete as is to be found. We substitute only when the customer so pleases. We sell only 3-5 eye divisions.

---

**Large Double**

**ALBATE (Crousse, 1885).** Very large, compact, globular rose type. Milk-white shaded ivory; wide center petals tinged lilac, edged with a minute line of carmine. Fragrant. Strong, vigorous grower. Free bloomer. Midseason. The best white peony in the list. $1.50 each

**ALBERT CROUSSE (Crousse, 1893).** A large, flat, compact bomb. Color rose-white, flecked crimson. Free bloomer. Late. $1.00 each

**ALEXANDRIANA (Callot, 1856).** Double rose type; very large and full. Light violet rose. Free bloomer. Strong, upright grower. .................. 75c each

**AVALANCHE (Crousse, 1886).** Large, compact, globular rose type. Pure white, edged with carmine. Midseason. $1.00 each

A Garden for the Connoisseur

$20.00
Gladioli

The new Gladiolus are without an equal for bedding or borders. As a cut flower they are far superior to any other Summer bloomer, either for lasting qualities or for the various uses for which they can be employed. If planted by the last of May they will bloom by the first to the middle of August, if cared for properly.

The Way to Plant. Dig the row or bed from eight to ten inches deep, then spread a liberal amount of good fertilizer in the bottom of the row or bed, then rake it in thoroughly before planting your bulbs; but if stable dressing is used it should be placed in the bottom of the drill or bed, then covered with fully an inch of soil before the bulbs are planted. The bulbs after being planted should then be covered from four to six inches deep; just as soon as they start to show their heads above the ground, they should then be cultivated. If this is continued once a week till they commence to flower, one will be sure of first-class results.

ADELINE KENT. Color delicate light rose pink, heavily ruffled from edge to center through from edges with ruby dastert array color with white center portions. Flowers are large, on fine long spikes. 1.00 each; 10.00 per doz.

HOW TO ORDER. Use our order blank. Please write your name, post office address and state. Always tell us how you want the goods to be shipped. Name your express or freight station. Do not write regular letters on our order blanks. Write them separately. Always glad to know just what you have in mind. Perhaps we can help you determine what is the wisest course to pursue. Note: When ordering Dahlias, always give number as well as name of the variety.

ORDER EARLY. All orders received by us are filed in rotation. Ordering early will insure the reservation of varieties that later may be sold out and save you disappointment. We do not substitute unless authorized to do so.

TIME OF SHIPMENT. Unless you give a specific shipping date, your order will be shipped to arrive at the proper time to plant in your locality. If you wish your order shipped at any special time, please so advise us.

HOW WE SHIP. We prefer shipping by express, customer to pay the charges. If you prefer sending by parcel post, postage to cover parcel post charges must be included in your remittance. Shrubs, evergreens, perennials and rose plants we will ship by express collect, unless you direct us otherwise and include postage. On dahlia bulbs we prepaid the postage and in certain advertisement offers we specify postage paid. All other commodities go to our customers collect.

OUR GUARANTEE. We guarantee all nursery stock furnished by us to be first class and true to name. We exercise the greatest of care to have all of our trees, plants and shrubs true to name, well grown, packed in the very best possible manner and hold ourselves in readiness, upon receipt of proper proof, to replace all trees and plants that may accidentally prove untrue to label free of charge, or refund the amount paid. We do not guarantee stock to grow or reach the dimensions or colors on the catalog. No complaints will be entertained that are not made immediately upon receipt of stock.

ACCURACY OF DESCRIPTION. All descriptions and other matter in this catalog will be found as nearly in accordance with actual facts as is humanly possible to write them. Great care has been taken to avoid exaggeration in descriptions of varieties. The varieties you select are always sent, unless you grant permission to substitute. If you wish a particular color rather than a particular variety, many times it is to your advantage to mention the fact as we may oftentimes improve upon your selection, with your permission. Therefore, if a substitute is acceptable, be sure to so advise us as otherwise everything is shipped absolutely as ordered.

OUR CUSTOMERS ARE OUR FRIENDS. Obviously it is impossible for us to visit the homes of all of our customers, but we are always glad to hear from them and always glad to help them in their selections, or to advise them as to the proper methods of planting and culture. It is the human interest in business that adds greatly to its satisfaction. We want your order, but we are just as much concerned about your success in producing to your entire satisfaction. If, after you have gone through this catalog carefully, you fail to find what you want, or are uncertain about your order, write us your plans and we will gladly advise with you as far as our ability will permit. May we ask you to place your order now? We will fill it at the proper time.

Thanking you for your patronage in the past and inviting your continued favors, we are,

Very truly yours,

JACOB SCHULZ COMPANY, INC.
